| Journal Name: | European Journal of Nutrition & Food Safety |
| Manuscript Number: | Ms_EJNFS_119767 |
| Title of the Manuscript: | INTENSIVE FOOD PRODUCTION: FROM NUTRITIONAL VALUE TO COMMERCIAL ONE |
| Type of the Article | |

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|---|---|---|
| <p>Compulsory REVISION comments</p> <ol style="list-style-type: none"> Is the manuscript important for scientific community? (Please write few sentences on this manuscript) Is the title of the article suitable? (If not please suggest an alternative title) Is the abstract of the article comprehensive? Are subsections and structure of the manuscript appropriate? Do you think the manuscript is scientifically correct? Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p> | <ol style="list-style-type: none"> The manuscript addresses the critical issue of how intensive food production has shifted the focus from nutritional to commercial value, impacting consumer health and environmental sustainability. This is a significant topic for the scientific community as it bridges the gap between food science, environmental studies, and public health. The current title is descriptive but could be more engaging. Suggested alternative: "Transforming Nutritional Integrity into Commercial Gain: The Impact of Intensive Food Production" The abstract is detailed but needs to be more concise. It should highlight the key findings and the significance of the study in a more structured manner. Reduce the length and focus on the main points such as the impact of industrial food production on nutrition, the role of additives, and the potential health implications. The manuscript is well-structured but can benefit from clearer subsections. For instance, breaking down the "Introduction" into more specific sections like "Historical Context," "Impact of Industrial Revolution," and "Current Challenges." Ensure each section has a clear purpose and transitions smoothly into the next. The manuscript is scientifically robust, but some sections could benefit from more recent references to support the claims, particularly regarding the health impacts of additives and industrial farming practices. Ensure that all data presented, especially statistics and specific examples, are accurately cited. The references are extensive but could be updated with more recent studies. Include recent studies from the past five years to ensure the manuscript reflects the latest research findings. | 7. |
| <p>Minor REVISION comments</p> <ol style="list-style-type: none"> Is language/English quality of the article suitable for scholarly communications? | <p>The language is generally clear but could benefit from professional proofreading to correct minor grammatical errors and improve readability. Ensure consistency in terminology, especially technical terms related to food science and industrial practices.</p> | |
| <p>Optional/General comments</p> | <p>Ensure all figures and tables are clearly labelled and referenced in the text. Consider adding more visual aids to illustrate key points, such as the impact of additives on health or comparisons of nutritional values. The manuscript is strong but requires some minor revisions to improve clarity, update references, and ensure scientific accuracy</p> | |
