Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The manuscript is important for scientific community. Although, I would have expected the author to include fabrication and performance evaluation of the robotic manipulator.</p> <p>What has been done is structure design and the analysis aspect was not really talked about in the article. I would suggest the title to be "Structure design of welding robot manipulator"</p> <p>The abstract is NOT comprehensive. Analytical result or data should be included.</p> <p>I would suggest the author should re-visit author guidelines in writing the article. The article is not well structured.</p> <p>What the author has written are correct.</p> <p>The references are okay and recent.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>It is suitable but could still be improved on. The author should avoid using e.t.c....It makes the listing unending.</p>	
<p>Optional/General comments</p>	<p>The manuscript should follow the right format and be arranged properly. Performance analysis could be included.</p>
