

Review Form 1.7

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_119601
Title of the Manuscript:	Neutrosophic Metric Spaces With Partially Ordered Multidimensional Fixed Point Theorems
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljamcs.com/index.php/JAMCS/editorial-policy>)

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes,</p> <p>yes</p> <p>need some change</p> <p>yes</p> <p>yes with minor comments</p> <p>Add some reference's</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>yes</p>	
<p>Optional/General comments</p>	<p>The results presented in the manuscript appear to be of interest. However, I support the publication of the article in its current form. The manuscript contains several minor issues that need to be addressed. The main points of concern are as follows:</p> <p>Suggestions for Improvement:</p> <ol style="list-style-type: none"> 1. Some notations and equations are messed up or not clear. Please use a proper equation editor format to make them clearly visible and understandable 2. all symbols should be italic in math form. 3. The references should have a clear and unified format. 4. In Keywords section add more keywords. 5. Are these new results sharp and more accurate compared with the others? 6. Abstract should be improved, as it has some shortcomings regarding the continuity of sentences. It should be revised in the sense that it clearly present the proposed idea effectively. 7. To increase the interest of the authors in this research, I suggest adding some applications to the results. 8. Some Theorem is not clear. Needs more discussion. 9. Improve literature review, historical background and add future scope of study more effectively. To handle this issue, author can discuss some well related and recent references. 10. Language quality needs improvement. 11. The linguistic review of the entire paper must be done well because 12. I have reviewed the paper. Presentation, the related literature and technical soundness are good. It presents good method. After made some additions to the paper, i recommend for publication 	

Review Form 1.7

	<p>13. I suggest adding some new relevant references to this topic.</p> <p>(a) New degrees for functions in (L, M)-fuzzy topological spaces based on (L, M)-fuzzy semiopen and (L, M)-fuzzy preopen operators, Journal of Intelligent and Fuzzy Systems, 36 (1), 787-803.</p> <p>(b) Neutrosophic fixed point theorems and cone metric spaces, Neutrosophic Sets and Systems, 2020, 31, 250-265. doi:10.5281/zenodo.3640600.</p> <p>(c) (Φ, Ψ)-Weak Contractions in Neutrosophic Cone Metric Spaces via Fixed Point Theorems, 2020, Journal Mathematical Problems in Engineering, 8, Pages 1-8.</p> <p>(d) On Mixed b-Fuzzy Topological Spaces, 2020, International Journal of Fuzzy Logic and Intelligent Systems, Volume (3), 242-246.</p> <p>(e) Identifying Internet Streaming Services using Max Product of Complement in Neutrosophic Graphs, International Journal of Neutrosophic Science, 2024, 23(1), pp. 257-272.</p> <p>(f) NEUTROSOPHIC g</p> <p>*</p> <p>-CLOSED SETS IN NEUTROSOPHIC TOPOLOGICAL SPACES, 2023, Journal International Journal of Neutrosophic Science, 20(4), 210-222. 10.54216/IJNS.200417</p> <p>(g) Fuzzy Totally Continuous Mappings based on Fuzzy m-Open Sets in Sostaks Sense, International Journal of Applied and Computational Mathematics, 2024, 10(2), 73</p> <p>Recommendation. I recommend accepting and publishing the paper after taking all the previous comments and observations and making some minor mod</p>
