

Review Form 1.7

Journal Name:	Asian Journal of Economics, Business and Accounting
Manuscript Number:	Ms_AJEBA_119817
Title of the Manuscript:	FIT INDICES IN STRUCTURAL EQUATION MODELING AND CONFIRMATORY FACTOR ANALYSIS: REPORTING GUIDELINES
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)																											
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes. It provides a comprehensive guide to researchers on the appropriate fit indices available in the statistical literature of structural equation modelling and confirmatory factor analysis</p> <p>Yes. The title of the article is quite appropriate for the work given in this article</p> <p>Yes. The abstract of the article is comprehensive. It captures all that are required for an abstract</p> <p>The subsections and structure of the manuscript are appropriate.</p> <p>Yes</p> <p>The references are sufficient but not recent as the latest work is 2016 for a 2024 article. There is need to bring the references update at least 2023. Additional information for the references is stick to one format (no line space or a single line space between the numbered references).</p>																												
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>																												
<p>Optional/General comments</p>	<p>Additional suggestions/comments of reviewer</p> <table border="1"> <thead> <tr> <th>Page</th> <th>Heading</th> <th>Comment</th> </tr> </thead> <tbody> <tr> <td>4</td> <td>1.1 chi-square test</td> <td>Citation of Chi-square test is required as given in 1.2 (Ullman, (2</td> </tr> <tr> <td>5</td> <td>1.3 goodness of fit index interpretation</td> <td>It takes a later work to confirm an earlier work. So, Byrne (1994) ad Bentler (1999)</td> </tr> <tr> <td>5</td> <td>1.1-1.3, fit indices not attributed to the people that proposed them.</td> <td>The last sentence of the paragraph needs to be connected with statement like "...with stricter criteria given in adjusted goodnes</td> </tr> <tr> <td>5</td> <td>1.3 GFI interpretation</td> <td>Bolden the word interpretation as you have others.</td> </tr> <tr> <td>7</td> <td>1.6 SRMR</td> <td>Model SRMR should be given before interpretation</td> </tr> <tr> <td>8</td> <td>Interpretation: RMR</td> <td>The interpretation should be bolded as others</td> </tr> <tr> <td>13</td> <td>3.2 PNFI</td> <td>df_{model} is not in the equation $PNFI = \dots$ check the model very well the numerator and denominator</td> </tr> <tr> <td>15</td> <td>Threshold value</td> <td>Defining the threshold value as given in Cronbach's alpha is sug because it makes it distinctly defined.</td> </tr> </tbody> </table> <p>General observations</p> <ul style="list-style-type: none"> Equations not numbered Line space before and after each equation for attractiveness of the equations 	Page	Heading	Comment	4	1.1 chi-square test	Citation of Chi-square test is required as given in 1.2 (Ullman, (2	5	1.3 goodness of fit index interpretation	It takes a later work to confirm an earlier work. So, Byrne (1994) ad Bentler (1999)	5	1.1-1.3, fit indices not attributed to the people that proposed them.	The last sentence of the paragraph needs to be connected with statement like "...with stricter criteria given in adjusted goodnes	5	1.3 GFI interpretation	Bolden the word interpretation as you have others.	7	1.6 SRMR	Model SRMR should be given before interpretation	8	Interpretation: RMR	The interpretation should be bolded as others	13	3.2 PNFI	df_{model} is not in the equation $PNFI = \dots$ check the model very well the numerator and denominator	15	Threshold value	Defining the threshold value as given in Cronbach's alpha is sug because it makes it distinctly defined.	
Page	Heading	Comment																											
4	1.1 chi-square test	Citation of Chi-square test is required as given in 1.2 (Ullman, (2																											
5	1.3 goodness of fit index interpretation	It takes a later work to confirm an earlier work. So, Byrne (1994) ad Bentler (1999)																											
5	1.1-1.3, fit indices not attributed to the people that proposed them.	The last sentence of the paragraph needs to be connected with statement like "...with stricter criteria given in adjusted goodnes																											
5	1.3 GFI interpretation	Bolden the word interpretation as you have others.																											
7	1.6 SRMR	Model SRMR should be given before interpretation																											
8	Interpretation: RMR	The interpretation should be bolded as others																											
13	3.2 PNFI	df_{model} is not in the equation $PNFI = \dots$ check the model very well the numerator and denominator																											
15	Threshold value	Defining the threshold value as given in Cronbach's alpha is sug because it makes it distinctly defined.
