| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| <p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p> | <p>The universities, the education that they provide, and the expectations that are placed on education are all subjects that are influenced by a variety of global and social shifts. A complete comprehension, substantial adaptability, and tangible measures are all required to accommodate the significant shift. While education is being deepened and systematised, an effort is being made to provide a better response than in the past to the needs for competence in working life. This is being done in conjunction with the doctorate education. Indeed, there has been a unified approach to doctoral education on a global scale, and additional focus has been placed on the new requirements for competence. The ongoing shifts in the circumstances, however, necessitate the need for a discussion regarding the future of PhD education and the physicians who will be graduating.</p> <p>A suitable title has been chosen for the article.</p> <p>The abstract of the paper is very detailed; nonetheless, there are a few sentences that might be difficult to understand.</p> <p>The organization of the manuscript, including its subsections, is appropriate.</p> <p>In terms of scientific accuracy, the manuscript is accurate.</p> <p>Although the references are adequate, they are not recent; you should make an effort to incorporate all references that are from within the last five years.</p> | |
| <p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p> | <p>The paper is written in a level of English that is appropriate for academic communication; nonetheless, there are a few sentences that may be difficult to understand.</p> | |
| <p>Optional/General comments</p> | | |
