<p>Optional/General comments</p>	The manuscript titled "Perception and Acceptance of Human Papilloma Virus Vaccine by Mothers in Owerri, Nigeria: A Cross-sectional Study" aims to investigate factors influencing HPV vaccine uptake among caregivers in Owerri, Nigeria. The study is timely and relevant given the high incidence of HPV-related cancers in Nigeria and the potential impact of increased vaccine uptake. The methodology is clearly defined, utilizing a cross-sectional design and convenience sampling to assess knowledge and attitudes towards the HPV vaccine.
