

Review Form 1.7

Journal Name:	Asian Journal of Research and Reports in Neurology
Manuscript Number:	Ms_AJORRIN_118955
Title of the Manuscript:	The Effect Of Methanoic Leaf Extract Of Mentha Piperita On The Histology Of The Cerebellum Of Adult Male Wistar Rats Exposed To Lead Acetate
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes The work is considered as a trial in the series for these compounds which is good. But there are some comments that should be regarded:</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>No Authors should add some recent references as the subject is frequently researched.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The script needs some editing</p>	
<p>Optional/General comments</p>	<p>1. Script errors.</p> <p>2. Rephrasing of this paragraph in the abstract: Results of histological investigation showed no adverse effect of the peppermint extract and lead acetate on the cerebral cortex. We can therefore conclude that peppermint at the doses and durations administered showed no adverse effect on the oxidative stress parameters and the histology of the cerebral cortex in Wistar rats.</p> <p>3. Why didn't the authors change the dose and time regimen to get more results?</p> <p>Why didn't the authors add and address other hematological parameters to prove that the extract is effective on earlier hematological changes?</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
