

**Editor's Comment:**

I have read the reviewer's comments about the manuscript 2024/IJTDH/119421, and the improvements included by the authors.

Manuscript Title: Antimicrobial Resistance Patterns of Bacteria Isolated from Pharmacy Technicians' Hands in Ghana

According to the reviewer's criticisms, the manuscript 2024/IJTDH/119421 is potentially suitable for publication in International Journal of TROPICAL DISEASE & Health. However, the lack of information regarding ethical approval is a concern that must be corrected before final acceptance of the manuscript. This is a recurring limitation in manuscripts submitted to the journal. Therefore, I suggest reinforcing in the guide for authors the need for ethical approval in studies with animals and humans, following the best scientific and editorial standards.
