Title of the Manuscript:	MENTAL HEALTH AND QUALITY SLEEP AMONG BRAZILIAN MEDICAL STUDENTS DURING COVID-19 PANDEMIC: PREVALENCE AND ASSOCIATED FACTORS
Type of the Article	Original Research Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The manuscript titled "Mental Health and Quality Sleep Among Brazilian Medical Students During COVID-19 Pandemic: Prevalence and Associated Factors" addresses a crucial topic that is highly relevant to the scientific community. It explores the impact of the COVID-19 pandemic on mental health and sleep quality specifically among medical students in Brazil. Given the significant stressors and challenges faced by healthcare students during this period, understanding these factors is essential for developing targeted interventions and support systems. This research not only focuses on the prevalence of mental health issues and sleep disturbances but also identifies associated factors, contributing valuable insights that can inform policies and practices aimed at promoting the well-being of medical students globally.</p> <p>YES</p> <p>YES The abstract should clearly state the aim of the study, such as investigating mental health and sleep quality among Brazilian medical students during the COVID-19 pandemic ,briefly describe the methods used, including study design, sample size, data collection methods and any statistical analyses performed.A summary of the main findings had been provided, such as prevalence rates of mental health issues and sleep disturbances, as well as factors associated with these outcomes.They conclude with the implications of the findings, such as suggesting interventions to support medical students' mental health during crises.</p> <p>GOOD</p> <p>YES</p> <p>NO</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>written in clear, concise language, avoiding unnecessary technical jargon, and should accurately reflect the content of the full article.</p>	
<p>Optional/General comments</p>	<p>NILL</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
