(If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes, excellent article,well studied,with good and percise documentation of results and correct statistical analysis .It is definitely impactful for the scientific community .</p> <p>Kindly add in which type of hospital set up,urban,rural, tertiary care hospital,private or government institute....the study is conducted. The abstract is comprehensive.</p> <p>The article is structured and all results, observations, methodology well scripted .. statistical analysis done correctly</p> <p>Yes,the manuscript is original with good scientific content.</p> <p>Yes reference recent and sufficient.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Excellent presentation in correct language</p>	
<p>Optional/Generalcomments</p>	<p>Kindly do not mention the name of the institute directly,instead write if it is urban,rural or tertiary care hospital.Mention the availability of resources like CT scan,MRI at ur institute.Mention availability of resource personnel for example in hospitals in remote,rural and tribal areas there is lack of availability of specialists,surgeons,anaesthesist, difficulty in communication causing delays unlike in urban cities where resources and resource personnel are readily available.</p> <p>Also the delay in operative intervention could have been correlated with the final outcome as mortality and morbidity caused due delay....none the less this has been mentioned as limitations of study.</p>
