

Review Form 1.7

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_118881
Title of the Manuscript:	EPIDEMIOLOGICAL ASSESSMENT OF HOSPITALIZATIONS DUE TO FALLS AMONG THE ELDERLY IN THE MESOREGION OF THE NORTHWEST OF THE STATE OF RIO DE JANEIRO, BRAZIL
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes as falls are an important topic but it would be good to include causes of fall in the study.</p> <p>Spelling error in title</p> <p>Please follow Strobe Guidelines to include the type of study in the abstract https://www.equator-network.org/reporting-guidelines/strobe/</p> <p>Please highlight important aspects of the results instead of just asking the reader to refer to the tables and charts. Why are there no male elderly that fell in Varre-Sai and Santo Antonio de Padua</p> <p>Yes</p> <p>Please ensure compliance with the STROBE guidelines when reporting the results. It is essential to include the motivation for conducting the study. Absolute numbers alone are insufficient for trend analysis; therefore, please present the data in terms of rates, considering the possible growth in the elderly population over time. Specifically, plot the incidence of falls as a proportion of the elderly population during the study period.</p> <p>Additionally, address the generalizability of the study's findings to the broader population of Brazil. The discussion of limitations appears to be rather concise; a more detailed examination of these limitations would enhance the robustness of the study.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes but please check for spelling errors eg in the title it should be northwest not nortwest</p>	
<p>Optional/General comments</p>
