<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>Fig. 2 – Absolute number of hospitalizations due to falls in the elderly population of the Mesoregion of the Northwest of Rio de Janeiro by city between 2014 and 2023. – it is a general practice not to present data with zero in a graph. Hence may be removed.</p> <p>The reasons for high falls in the various regions may be listed and quantified in terms of extrinsic and intrinsic factors. Repeated hospitalizations due to falls may also be reported region wise, age wise and gender wise.</p> <p>Keeping in view of the guidelines responsible for the sharp decline in elderly hospitalization rates due to falls in the city of Cambuci, new and updated guidelines may be recommended by the authors for the regions reported in the study.</p> <p>The mortality due to falls alone without the added exacerbating other health conditions may be looked into.</p> <p>Points highlighting effective Public Health interventions in Miracema and Itaocara could be indicated in the conclusion part, which will strengthen the conclusion part</p>
