Is the title of the article suitable? (If not please suggest an alternative title) 3. Is the abstract of the article comprehensive? 4. Are subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<ol style="list-style-type: none"> 1. It's a well-established treatment option for sialocele. 2. Title is suitable for article. 3. Abstract is comprehensive. 4. Obstruction due to stone has other treatment options also so why you choose adenectomy , better describe. 5. As a case report its okay . 	
<p>Minor REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<p>Complementary exams tests were requested like cervical radiography and ultrasound, blood count and hepatic and renal biochemical profile through measurement of serum alanine aminotransferase (ALT), alkaline phosphatase (AF), urea and creatinine.</p> <p>were requested like cervical radiography and ultrasound, blood count and hepatic and renal biochemical profile through measurement of serum alanine aminotransferase (ALT), alkaline phosphatase (AF), urea and creatinine.</p> <ol style="list-style-type: none"> 1. Complementary exams tests - meaning ? 2. Why hepatic and renal function is important for this surgery in this condition ? <p>The patient in the present report presented a mucocele of the left mandibular gland, in line with the description [5] of a higher prevalence of cervical sialocele in canine patients</p> <ol style="list-style-type: none"> 1. I could not find out the reference no- 5. 2. higher prevalence of cervical sialocele in canine patients. - meaning? 3. What do you mean by Sialodenoceentesis, bcoz for cytology fluid was aspirated. 4. The technique used was associated with a passive postoperative drainage system with removal after four days, as well as Penrose or negative pressure drains [5]. Did not find it. 5. Is it conclusion or recommendation ? 	
<p>Optional/General comments</p>
