

Review Form 1.7

Journal Name:	Asian Journal of Advances in Agricultural Research
Manuscript Number:	Ms_AJAAR_119925
Title of the Manuscript:	REPRODUCTION IN INSECTS
Type of the Article	Review Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><u>Compulsory</u> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>The research on insect reproduction is of great significance to the scientific community. It helps improve our knowledge of insect biology, especially in terms of reproductive strategies and genetic mechanisms. This is vital for the development of efficient pest control methods, which are necessary for the health of agriculture and ecosystems. The study plays a critical role in various scientific fields and is essential for addressing fundamental biological inquiries and practical issues in agriculture and conservation.</p> <p>Yes</p> <p>Yes, Spacing and grammatical error to be revised, longer sentences could be broken for better clarity</p> <p>Yes</p> <p>The study of insect reproduction covers many important aspects and gives a general overview of the field. It is important to categorize the information into separate sections or paragraphs that introduce each idea or process before going into details. Furthermore, including recent advancements or studies in insect neurobiology, microbiome research, and environmental entomology could improve the review by offering current insights into these fields.</p> <p>Yes</p> <p>The citations in the text are currently not in chronological order. Additionally, references 5, 10, 24, 27, and 59 have not been included in the text.</p> <p>Scientific names should be properly capitalized and italicized for accuracy. The entire paper requires thorough examination for alignment, spacing, font, and style</p>	
<p><u>Minor</u> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Corrections marked in manuscript (in red)</p> <p>See the attachment</p>	
<p><u>Optional/General</u> comments</p>
