

Review Form 1.7

Journal Name:	International STD Research & Reviews
Manuscript Number:	Ms_I-SRR_119775
Title of the Manuscript:	SOCIODEMOGRAPHIC PROFILE AND SEXUAL QUALITY OF LIFE IN PATIENTS WITH DHAT SYNDROME
Type of the Article	Original Research Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Yes.The author explored the socio-cultural variables that predispose many adolescents to Dhat syndrome. This is why they have problems with assertiveness and sexual relationship.</p> <p>2. No.The topic could be amended to read SOCIO-CULTURAL DEMOGRAPHIC PROFILE AND SEXUAL ACTIVITIES AMONG PATIENTS WITH DHAT SYNDROME</p> <p>3. No. It doesn't contain the motivation of the author and Recommendations based on the results of the findings. Again it contains unnecessary subheadings. 4. The sub headings are not appropriate. There is no headings for conceptual framework, theoretical perspectives and empirical studies already done on the topic or re.ated topics. Again it has neither area of study nor scope of the study as well as limitations. 5.It is relatively scientifically correct but there is the need for some minor corrections. 6. The references failed to follow the APA style of 7th edition. It should have no serial numbers and it was not written alphabetically. It is therefore not correct and recent. The study should provide measures of detection of the psychological variables like anxiety of the hospital environment as well as peer influence which can be confounding factors for DHAT. Nevertheless there is the presence of rigorous scientifically findings</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>1.The English language Is okay and relatively scholarly.</p>	
<p>Optional/General comments</p>	<p>The has some social significance though.the Author failed to mention that</p>
