

Review Form 1.7

Journal Name:	Journal of Advances in Medical and Pharmaceutical Sciences
Manuscript Number:	Ms_JAMPS_119499
Manuscript Title:	Multiple Drug Resistance in Burn Patients
Article Type	

Review Form 1.7

PART 1: Review Comments

	Reviewer comments	Author's comments (if approved by the reviewer, correct the manuscript and highlight that part in the manuscript. The author must write his response here)
<p>COMMENTS MUST REVISION</p> <ol style="list-style-type: none"> 1. Is the manuscript important to the scientific community? (Please write a few sentences on this manuscript) 2. Is the title of the article suitable? (If not, please suggest an alternative title) 3. Is the article abstract comprehensive? 4. Are the subsections and structure of the manuscript appropriate? 5. Do you think the manuscript is scientifically correct? 6. Are the references sufficient and up to date? If you have additional reference suggestions, please indicate them in the review form. <p><u>(Apart from the 6 points mentioned above, reviewers are free to provide additional suggestions/comments)</u></p>	<ol style="list-style-type: none"> Manuscript important for community scientific about Multiple Drug Resistance in Burn Patients is very serious relevant and essential . Following is a number of reason Why script This own importance : <ul style="list-style-type: none"> Significant Health Problems : Manuscript This discuss infection , which is complications general and causes main death in patients wound burn . Infection This become more complicated Because exists resistance to Lots medication , which reduces effectiveness treatment standard . Challenge in Treatment : Development resistant pathogens to drugs traditional challenge effectiveness therapy . This matter emphasize necessity development drug antimicrobial new and implementation procedure strict For control spread infections in the environment House Sick . Impact on Health Outcomes : Resistance medication in patients wound burn can impact serious about results end maintenance them , incl level healing and numbers death . It highlights importance efficient and precise handling time to infection This . Sensitivity To Context Clinical : Manuscript This reflect sensitivity to condition clinical special patient wound burn , incl weakening system immunity body and often need maintenance invasive . This matter clarify risk tall to resistant infection to medicine in the population This . Relevance For Development Health Policy : Information disclosed in script This can give base for development policy more health effective in overcome problem resistance medication in patients wound burn , fine in arrangement House Sick nor in development of therapeutic strategies . <p>With So , script This No only give understanding deep about complexity resistance medication in patients wound burn , but also give strong foundation For study more continue and take action more intervention Good in practice clinical .</p> The title of the article indeed reflects the main topic discussed in the manuscript, namely "Multiple Drug Resistance in Burn Wound Patients" which must be taken into account when selecting the title depending on the main focus and approach taken in the article. Make sure the title accurately describes the information presented in the manuscript, so that readers can immediately understand the topic and purpose of the article. Abstract This give enough picture comprehensive about topics discussed in the research this , that is infection in patients wound burn and resistance drug double . However , for increase clarity and focus abstract , some points Can repaired including specifications Topic : Making sure that abstract in a way clear mention topic main such as " infection " , " wound burn " , and " resistance drug double " can help reader understand topic article with more fast . Yes, structure your script is visible Already Enough Good . Structure Your manuscript is organized with good and the content delivered is very informative . Next , make sure For inspect conformity and coherence every subsection as well as continuity channel from One part to part other For ensure consistency and smoothness reading . Manuscript This Already follows a common format used in writing scientific , esp in introduce topic in a way clear and presenting background behind relevant problems . However , there is some suggestions for consider : Structure and Flow : Make sure For own consistent flow between paragraphs . For 	

Review Form 1.7

	<p>example , after introduce problem general wound burns and infections , you can describe epidemiology in a way more detailed before switch to prevention and control strategies infection .</p> <p>Scientific Language Style : Consider For use term standard and language Consistent scientific knowledge throughout script . This matter help reader For understand with clear information submitted .</p> <p>With consider bullet points this , you can ensure that your script does not only in accordance with standard scientific , but also easy understandable and informative for intended readers .</p> <p>6. References you provide apparently Enough diverse and encompassing various aspect related wound burn , incl epidemiology , management infection , resistance antibiotics , and others . However , some reference the Possible need updated or clarified date its publication For ensure novelty information . Following is a number of possible reference need note:</p> <p>From reference here , some has published in 2023 or 2022 , which is possible Still Enough new For support study your latest . However , it's important For inspect is There is revision or study the newest one yet including in this list.As example , several reference from in 2022 or 2023 maybe give more understanding up to date about trend latest in management wound burn , epidemiology , resistance antibiotics , and approaches therapeutic other .</p>	
<p>Minor REVISION comments</p> <p>1. Is the quality of the article in Bahasa/English suitable for scientific communication?</p>	<p>Your English write seen Already Enough in accordance with style Language scientific For topic infection in patients wound burn , Languages used can with easy for readers to understand .</p>	
<p>Optional/Generalcomment</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
