<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<ol style="list-style-type: none"> The paper presents the results of a study with the potential to contribute to studies of this nature in other areas, with the aim of verifying the degree of contamination. The title of the paper is appropriate. The abstract is correct, but I suggest including information on the methodology used in the work. The subsections and structure of the manuscript are appropriate for a scientific communication of research. The work presents results consistent with the proposed objective, so from an academic point of view it is correct. The bibliographical references used are consistent with the proposal of the work. I would suggest improving the editing of the text, as there are many blank spaces throughout the work. 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	The language is clear with no spelling or punctuation errors.	
<p>Optional/General comments</p>	No comments
