

**Editor's Comment:**

I carefully reviewed both the original and revised versions of the manuscript, taking into account the reviewers' feedback. The reviewers' comments were relevant and contributed to improving the quality of the manuscript. It am happy to accept that the authors had indeed made revisions in response to the reviewers' comments. The manuscript is now clearer, more detailed and better aligned with the focus of the journal.

With the exception of minor issues related to typesetting, reference checking, and linguistic editing, the manuscript is comprehensive and well prepared. In my opinion, the document covers a relevant topic and has the potential to make a significant contribution to its respective field of knowledge.

I recommend the acceptance of the manuscript.
