

Editor's Comment:

It is a very interesting, scientifically rigorous and clear text that definitely deserves publication in AJPAS. However, I would draw the authors' attention to the following detail:

- A period or paragraph must not begin with a [.] as happens, for example, in the 6th line of the Introduction:

". [22] do forecasting fuzzy time..."

It gets better, for example:

" . In [22] is done forecasting fuzzy time..."

" . As can be seen in [22] forecasting fuzzy time is done..."

or other analogue. Please check similar situations and correct them.
