

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Research in Infectious Diseases
Manuscript Number:	Ms_AJRID_118971
Title of the Manuscript:	LASSA FEVER: A Review of Clinical Features, Diagnosis and Treatment
Type of Article:	MINI REVIEW ARTICLE

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I still find some limitations in the revised version of this review as being a narrative review. Selection bias in selecting available literature related to the topic under review can limit its quality. In medical literature its preferred to consider the hierarchy of evidence of epidemiological studies.</p> <p>I hope to see rigor methodology for this review</p> <p>Correct the position of table title , what are sources for this summary , I understand its developed by the author (s) , however , it's still a review of previous work need to be acknowledged.</p> <p>Be consistence in reference style and correct the reference list</p> <p>For example 18. Hossain, Md. I., Bhattacharya, P., & Islam, Md. A. (2023). Resurgence of Lassa fever in Nigeria: clinical features, epidemiology, pathogenesis, diagnostic methods, and treatment. <i>International Journal of Surgery: Global Health</i>, 6(5). https://doi.org/10.1097/gh9.0000000000000238</p> <p>19. Ilesanmi, A. O., Oton, E., & Afolabi, A. (2021). Community engagement in the prevention and control of lassa fever in africa: A systematic review. In <i>Infection, Epidemiology and Microbiology</i> (Vol. 7, Issue 2). https://doi.org/10.52547/iem.7.2.187</p> <p>17)Madueme PU, Chirove F. Understanding the transmission pathways of Lassa fever: A mathematical modeling approach. Infect Dis Model. 2022 Nov 30;8(1):27-57. doi: 10.1016/j.idm.2022.11.010. PMID: 36582748; PMCID: PMC9762202.</p> <p>Still notice typo/grammatical errors</p> <p>Example> None of this drugs</p>	<p>Refernces have been adjusted and is consistent.</p> <p>The above manuscript is a minireview article and hence didn't follow any systematic pattern for article selection and writeup. Articles utilized were those considered recent and those we had assess to.</p> <p>Source of table 1 and position of the heading has been adjusted.</p> <p>Typogrammatic errors have been corrected.</p> <p>We thank you for your rigorous effort and time to ensure this manuscript is of high quality. We are open to further corrections.</p>
