

Review Form 1.7

Journal Name:	Journal of Scientific Research and Reports
Manuscript Number:	Ms_JSRR_119606
Title of the Manuscript:	Experimental Investigation of Hardness and Impact Variability in Agricultural Equipment Materials
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><u>Compulsory</u> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>This article is important for the scientific community of materials sciences, and of improvement of agricultural tools because it gives a new approach to the usefulness of various types of wood that can be used in the manufacture of said tools, determining their impact and viability.</p> <p>It is suggested "Determination of the impact on hardness and variability in agricultural equipment materials made with wood, an experimental investigation"</p> <p>The summary is structured in its different aspects and the objective of the research, the methodology, the results and conclusions can be clearly identified.</p> <p>The article has its regulatory parts: introduction, theoretical part, experimental part with images, results with tables and graphs, conclusions and bibliographic references</p> <p>One way to analyze and search for the authenticity of the results is to perform a statistical analysis using some package, in this case the ANOVA, where we can observe the data obtained with its variation, which allows us to observe its behavior.</p> <p>All of your bibliographical references are not current.</p>	
<p><u>Minor</u> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The language used is technical English, which is suitable for academic school work.</p>	
<p><u>Optional/General</u> comments</p>
