**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p><b>Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.</b></p>	<p>I like this manuscript because it's give valuable insights into the complex dynamics of classroom interactions, highlighting the specific problems students face, such as family issues, examination stress, financial difficulties, and relationship challenges. This understanding is crucial for educators, psychologists, and policymakers to develop targeted interventions. Understanding the needs for both teachers and students will help to develop a holistic approach.</p>	
<p><b>Is the title of the article suitable? (If not please suggest an alternative title)</b></p>	<p>This title is ok, to make it more concise, the author can opt to a more direct title for example "Exploring Classroom Interaction Challenges and Teacher Coping Strategies in Public Elementary Schools".</p>	
<p><b>Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.</b></p>	<p>The authors can elaborate on the findings regarding the degree of classroom interactive problems and coping mechanisms.</p>	
<p><b>Are subsections and structure of the manuscript appropriate?</b></p>	<p>The author should include subsections for background of studies, problem statement, objectives, hypothesis, and literature review.</p>	
<p><b>Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.</b></p>	<p>In result and discussion, the author should present Table 1 the descriptive statistics of the classroom interactive problems of students and table 2 the descriptive statistics of teachers coping mechanism (please correct title for table 2 and 3.2 subsection heading). The descriptive statistics should include mean and also standard deviation.</p> <p>In table 3, please check again the results for Pearson Product Moment Coefficient Correlation (Pearson r). The result should show the correlation between two domains. For example;</p> <p><i>The Pearson correlation analysis revealed a statistically significant positive relationship between family problem and talk positively (r = 0.37, p &lt; .05). This indicates that as the family problems increases, teacher coping mechanisms (talk positively) also tend to increase.</i></p> <p>The authors should introduce multiple linear regression. The authors should also provide the diagnostics indicated that the assumptions of normality, homoscedasticity, and independence of residuals were met, supporting the validity of the regression model. To explain table 4, the author should write in text the interpretation of results for regression analysis.</p>	
<p><b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p>	<p>In the results and discussion sections, more references to similar studies or contrasting findings would strengthen the interpretation of your data. This will also allow for a more nuanced discussion of the implications of your findings.</p>
