

Review Form 3

Journal Name:	Asian Journal of Biology
Manuscript Number:	Ms_AJOB_120217
Title of the Manuscript:	Clinical manifestations of Dermatophytoses and its treatment: A Review
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.		
Is the title of the article suitable? (If not please suggest an alternative title)		
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.		
Are subsections and structure of the manuscript appropriate?		
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.		
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. =		

Review Form 3

<p>Minor REVISION comments</p> <p>Is language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>	<p>Comments on the Article: Clinical Manifestations of Dermatophytoses and Its Treatment: A Review</p> <p>Abstract The abstract provides a good summary of the review, covering the key points regarding dermatophytes, their clinical manifestations, and treatment options. However, it could benefit from more clarity and conciseness. Specifically, consider rephrasing for improved readability and coherence.</p> <p>Introduction The introduction is comprehensive and sets the stage for the rest of the review. However, it can be improved by clearly outlining the structure of the paper and the main points that will be discussed.</p> <p>Types of Dermatophytic Fungi This section is informative and well-structured. The table summarizing the sources and affected organisms is helpful. However, ensure consistency in formatting and clarity in presenting the information.</p> <p>Mechanism of Action of Invading Dermatophytic Fungi This section provides a clear explanation of how dermatophytes invade and infect the host. Including more detailed descriptions of the enzymes involved and their specific roles could enhance the reader's understanding.</p> <p>Clinical Types of Dermatophytoses The clinical descriptions are detailed and provide a clear picture of each type of dermatophytosis. Including more visual aids, such as photographs or diagrams, could make this section more engaging and easier to understand.</p> <p>Diagnosis of Dermatophytoses The section on diagnosis is concise and informative. Expanding on the newer molecular techniques and their advantages over traditional methods would be beneficial.</p> <p>Treatment of Dermatophytoses The treatment section is thorough and well-organized. However, discussing the pros and cons of different antifungal agents and including recent advancements in treatment options would provide a more comprehensive view.</p> <p>Conclusion and Future Perspective The conclusion summarizes the main points effectively. However, it could be more forward-looking by discussing potential future research directions and the development of new treatment strategies.</p> <p>Recommendations</p> <ol style="list-style-type: none">1. Language and Clarity: Improve the language for better readability and clarity. Ensure that complex terms and concepts are explained in simpler terms where possible.2. Consistency: Ensure consistency in formatting, especially in tables and references.3. Depth of Content: Include more detailed explanations in sections like the mechanism of action and treatment options.4. Visual Aids: Add more visual aids to enhance understanding, especially in the clinical manifestations section.5. Recent Developments: Incorporate recent research findings and advancements in treatment	

Review Form 3

	<p>to keep the review up-to-date.</p> <p>Recommendation: Minor Revision</p> <p>The article is well-structured and covers the topic comprehensively. However, minor revisions are needed to improve clarity, consistency, and depth of content. Once these revisions are made, the article will be suitable for acceptance.</p>
