

Review Form 3

Journal Name:	Asian Research Journal of Gynaecology and Obstetrics
Manuscript Number:	Ms_ARJGO_120280
Title of the Manuscript:	HYSTEROTOMY AND MYOMECTOMY FOR RETAINED PLACENTA IN A UTERUS: A CASE REPORT
Type of the Article	Case report

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.</p>	<p>This case report concern with retained placenta which represents nowadays one of the sever cases and characterized by wide incidence in both human and animals. However, the manuscript needs major revision. The manuscript contains a lot of grammar errors which need to be checked carefully. In addition, some comments and recommendations should be performed as mentioned latter.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>1. The introduction is very small and more details about the problem of retained placenta need to be added with recent references. However the authors can add data from experiment and researches that carried out in human and also in animals. The authors should present the problem of retained placenta efficiently. So the authors can use the following opening before talking about retained placenta: Retained placenta is one of the severe problem the affect the reproduction and characterized by wide occurrence in human (Perlman and Carusi , 2019) and also in animals (Amin et al., 2021) (Amin and Hussein, 2022).</p> <ul style="list-style-type: none"> □ Perlman, N. C., & Carusi, D. A. (2019). Retained placenta after vaginal delivery: risk factors and management. <i>International journal of women's health</i>, 527-534. □ Amin, Y., Zakaria, A., & Hasan, A. (2021). The efficacy of treatment of retained placenta with chlortetracycline and oxytetracycline through local intrauterine route in dairy cows. <i>J. Anim. Health Prod</i>, 9(2), 100-106. □ Amin, Y. A., & Hussein, H. A. (2022). Latest update on predictive indicators, risk factors and „Omic“technologies research of retained placenta in dairy cattle–A review. <i>Reproduction in Domestic Animals</i>, 57(7), 687-700. 	
<p>Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>The authors mentioned “Uterine fibroids or leiomyomata are the commonest neoplasm of the female genital tract in particular”. This sentence contains grammar error and need correction. The correction includes addition of comma after the words “Uterine fibroids” and the word “leiomyomata”.</p> <p>The authors mentioned “seen in 20-50% of women in the reproductive age and can be seen in 3-12% of pregnant women”. This sentence contains grammar error and need correction. The correction include replace the words “in the” by the word “of”. In addition, delete the words “can be seen”</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>The authors mentioned “They occur predominantly in the reproductive age group with the peak age”. This sentence contains grammar error and need correction. The correction includes addition of comma after the word “group”.</p>	
<p>Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.</p>	<p>The authors mentioned “Most women with fibroids have uneventful pregnancies, however, they have been linked to an increased risk of spontaneous abortion, fetal malpresentation” This sentence contains grammar error and need correction. The correction include replace the comma after the word “pregnancies” by the spotted mark “pregnancies;</p> <p>The authors mentioned “The management of retained placenta involves manually removing the placenta with adequate analgesia, as medical intervention alone is not effective.” Here the authors should mention that several studies focus in the different methods that were used for the management of retained placenta and should use recent reference for this management. However, the studies should include human and animals to be in wide range and to be more evidenced.</p> <p>So the authors can use the following opening before talking about management of retained placenta:</p>	

Review Form 3

	<p>Several studies focused in evaluating different methods for the management of retained placenta either in human (Perlman and Carusi , 2019) or animals (Amin et al., 2019)</p> <ul style="list-style-type: none"> ▫ Perlman, N. C., & Carusi, D. A. (2019). Retained placenta after vaginal delivery: risk factors and management. <i>International journal of women's health</i>, 527-534. ▫ Amin, Y. A., Elqashmary, H. A., Karmi, M., & Essawi, W. M. (2023). Different protocols in treatment of placental retention in dairy cows and their influences on reproductive performance. <i>Reproduction in Domestic Animals</i>, 58(8), 1114-1124. <p>The authors mentioned "However, umbilical vein injection with oxytocin has been found ineffective in a large RCT with 577 women". What does the abbreviation "RCT" refer to? It is better to mention the word in the full form in the first and followed by its abbreviation in brackets. Then the abbreviation can be used alone.</p>	
<p>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>=</p>	<p>The authors mentioned "Retained placenta due to uterine fibroid not amenable to manual removal through the vaginal is a rare and worrisome finding". This sentence contains grammar error and need correction. The correction include replace the word "vaginal" by the word "vagina". In addition, delete the words "can be seen"</p> <p>The authors mentioned "In such situations, laparotomy with myomectomy and hysteromy for placenta removal becomes a viable alternative". This sentence contains grammar error and need correction. The correction include replace the words "becomes a" by the word "become". In addition, replace the words "alternative" by the word "alternatives"</p>	
<p><u>Minor</u> REVISION comments</p> <p>Is language/English quality of the article suitable for scholarly communications?</p>	<p>The reference list was written in different forms (such as references of 1, 2, 3, and 9). Therefore, the references should be corrected and written by one fixed form according to the style of the journal.</p>	
<p><u>Optional/General</u> comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
