<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1- The research topic is important because it simulates environmental pollution with plastic and thus its direct impact on the health of living organisms alike (human, animal or plant). Its importance also comes from the use of insects as a tool for biodegradation of plastic, thus reducing the collateral damage of plastic waste and also reducing the financial cost of removing it.</p> <p>2- It is preferable that the title be as follows (Insect biodegradation of plastic).</p> <p>3- Yes, we can consider it comprehensive</p> <p>4- The sequence of main and sub-topics of the research is good and fairly comprehensive, but it is better to replace the paragraph 3.2 instead of 3.1 in the sequence.</p> <p>5- It is good</p> <p>6- I think there is some verbosity in the use of sources that can be reduced if possible, and it also needs some arrangement and unification.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Rather good
