Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	To recommend effective control measures for pests and pathogens, it is important to recognise the pest/pathogen dynamics, population trends, and the emergence of new pests/pathogens specific to the region. The present study aims in this direction	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	Correlation study examining temperature, relative humidity and other ecological factors with pest/pathogen invasion is critical for effective pest/pathogen management technologies, as these factors significantly affect pest/pathogen occurrence and damage. Executing prophylactic control measures based on seasonal pest/pathogen occurrences and their natural enemies can reduce the need for curative practices. Therefore, the present study aims to investigate insect pests occurrence in castor crop to ensure the environmental safety.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	Yes
