

Review Form 3

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_120745
Title of the Manuscript:	Tooth discoloration induced by calcium silicate-based sealers
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	It is a good research enabling dental surgeons and endodontists to select root canal sealers which might cause least tooth color change post endodontic therapy. It also enables clinicians not to give full coverage dental crowns post treatment.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	Usage of spectrometry is a good device to accurately measure the change of colour in each tooth after applying sealers of various composition. Even selection of number of cases on the basis of statistical analysis was quite robust and appreciated.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	Yes	
Minor REVISION comments Is language/English quality of the article suitable for scholarly communications?	In materials and methods? Please check sentences reading 'the sealer were places' will change to 'the sealer were placed'. Why only Bovine teeth were selected for the study? And How much structurally and histologically are they different from human teeth?	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
