

Review Form 3

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_120745
Title of the Manuscript:	Tooth discoloration induced by calcium silicate-based sealers
Type of the Article	Original Research Article

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<p>Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.</p>	<p>The article addresses an important issue in endodontics and provides valuable insights into the potential side effects of commonly used sealers. With revisions focused on clarity, depth of analysis, and methodological transparency, this could make a significant contribution to the field.</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p>Yes</p>	
<p>Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>Yes its structured and well written</p>	
<p>Are subsections and structure of the manuscript appropriate?</p>	<p>Yes</p>	
<p>Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.</p>	<p>The overall structure of the article is clear and well-organized. However, there are instances where the flow of ideas could be improved for better readability.</p> <p>The results presented are intriguing and suggest a correlation between the use of calcium silicate-based sealers and tooth discoloration. However, a more in-depth discussion and interpretation of the results in relation to existing literature and clinical implications would provide greater insight</p> <p>The discussion adequately addresses the findings but could benefit from a deeper exploration of the mechanisms underlying tooth discoloration caused by calcium silicate-based sealers. Additionally, the conclusion should succinctly summarize the key findings and their potential impact on clinical practice.</p>	
<p>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p>	<p>Yes</p>	

Review Form 3

Minor REVISION comments Is language/English quality of the article suitable for scholarly communications?	The language used is generally appropriate for the target audience but requires some refinement for clarity and precision. Pay attention to grammar, syntax, and sentence structure throughout the manuscript.	
Optional/General comments	None	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes. Kindly please write down the ethical issues here in details)</i>
