

Editor's Comment:

There are two issues that the authors must correct,

1- In the references section, at the end of the article, each of the references has a duplicate number. The two informations must be combined in a single number. Authors should consult the JERR journal's instructions on how to reference, or see an already published JERR article.

2- References in the text must follow the increasing order [1], [2], [3], ..., [12] and reorder the references section accordingly.

After doing this, the article can be published.
