

**Review Form 1.7**

Journal Name:	<b>Asian Journal of Advanced Research and Reports</b>
Manuscript Number:	<b>Ms_AJARR_119926</b>
Title of the Manuscript:	<b>Design of Facial Recognition Door Opening System with Push Button Combination Using Intelligent Computers Based on the Internet of Things</b>
Type of the Article	

**Review Form 1.7**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b><u>Compulsory</u></b> REVISION comments</p> <p><b>1. Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p><b>2. Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p><b>3. Is the abstract of the article comprehensive?</b></p> <p><b>4. Are subsections and structure of the manuscript appropriate?</b></p> <p><b>5. Do you think the manuscript is scientifically correct?</b></p> <p><b>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><b><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></b></p>	<p>The manuscript gives a significant contribution to the field of home security. It addresses the practical need for enhanced security measures in residential environments, leveraging modern technology to create a robust solution. The integration of facial recognition with IoT and the use of Raspberry Pi for controlling the door lock system is innovative and timely, reflecting the advancements in the Industrial Revolution 4.0 era. This research not only provides a technological solution but also emphasizes the practical application, making it a valuable read for both researchers and practitioners in the field.</p> <p>Yes, the title is descriptive but a bit lengthy. The alternative title will be "IoT-Enabled Smart Door Lock with Facial Recognition and Push Button Control".</p> <p>The abstract provides a thorough overview of the study, covering the problem statement, the technology used, and the objectives of the research. However, it could benefit from a clearer summary of the key results and implications. Including a brief mention of the testing outcomes and the practical advantages of the system would make it more comprehensive and impactful.</p> <p>The subsections and structure of the manuscript are well-organized, making it easy to follow the flow of information from introduction to methodology, and results. Each section logically builds on the previous one, providing a clear and coherent narrative. Ensuring that each subsection has a clear heading and is consistently formatted would enhance readability and professionalism.</p> <p>Yes, the manuscript appears to be scientifically sound, as it is based on established technologies and methodologies, such as IoT, facial recognition, and Raspberry Pi. The experiments and testing procedures are well-documented, supporting the validity of the results. The logical progression of the study and the clear presentation of data further reinforce its scientific accuracy.</p> <p>Yes, the references in the manuscript are relevant and cover a range of foundational and recent works in the field of IoT and facial recognition technology.</p>	
<p><b><u>Minor</u></b> REVISION comments</p> <p><b>1. Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>Yes, the language and English quality of the article are generally suitable for scholarly communication. The manuscript is clear and easy to understand, with well-structured sentences and appropriate terminology. Minor improvements in grammar and phrasing could enhance readability and polish the overall presentation, but the current level is acceptable for an academic audience.</p>	

**Review Form 1.7**

<b>Optional/General</b> comments
