Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. Rare cases and unusual findings are expected to be mentioned in case reports, While the current article mentions routine cases</p> <p>2. The role of CT scan in diagnosis is not mentioned in any part of the article and only radiographic findings are briefly interpreted</p> <p>3. Yes</p> <p>4. No</p> <p>5. No. It does not represent the purpose of the title</p> <p>6. No</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	Yes, with minor revision	
<p>Optional/General comments</p>	The cases should be written with more clinical and radiographic details and the definitive diagnosis method should also be mentioned. In addition, the role of CT scan and its superiority in diagnosis compared to conventional radiography should be mentioned. Key points in radiographic diagnosis of lesions should be written with more accuracy and better details. The subtitles of the images must be written and pathological finding marked with arrows on each radiographic image. The discussion part in the article is written very briefly and the purpose of the study is not addressed	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
