EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>1. The author(s) must cite the source for the analyses they use in the method.</p> <p>2. They should indicate the importance of their calculations with the Markov chain model.</p> <p>3. The author(s) should indicate where other countries get their export data from.</p>	<p>Included in the material and methods and highlighted with yellow colour (Page no. 3 & 5)</p> <p>Included in the manuscript and highlighted with yellow colour (page no. 5). The markov chain approach helps us to know the probability of retention of trade by a particular country from the previous year's trade and to know which are the loyal countries in importing Indian tomato and thereby Indian Agri export policies can be made accordingly.</p> <p>Included in the manuscript and highlighted with yellow colour (page no. 2) The export to other countries data was also obtained from the APEDA website only. Here, other countries mean total export of tomatoes from India minus export of tomatoes from India to the major five countries mentioned in the study.</p>
