

**Editor's Comment:**

The paper is accepted with revision.

Please, clarify the methods of prevention of mother to child transmission (PMTCT).

Please, mention the number and date of Ethical Review Committee of Federal Medical Centre approval.

Please, add to methods of statistical analysis the P value of the significance used in the analysis.

Please add the missed dot "." to the end of some sentences such as where the mode of delivery (caesarean section vs SVD) was statistically significant ( $P < 0.00$ ).

Some references appear without full data such as No. 2 & 24. For these references you can add the website link.
