

Review Form 3

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_120435
Title of the Manuscript:	Assessment of Kodo Millet Genotypes for Salt Stress Tolerance at the Seedling Stage Using Germination Tray
Type of the Article	

Review Form 3

PART 1: Review Comments

Compulsory REVISION comments	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.	This is a very interesting study that will have a great contribution to the scientific community. The study seek to address very important agronomic aspects salinity which is the cause of yield loses and economic loss to the farmers.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.	No, the author should add more information on the methods such that the parameters studied are appear in the abstract. Intext editing has been made in the abstract. NB: abstract must be informative but precise.	
Are subsections and structure of the manuscript appropriate?	Yes	
Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.	The author should add more information on the materials and methods. Remember methodology is the road map of the study. Therefore it must be clear for every reader. The author should add and explain the study locations, plant material used and were it was collected or obtained (list of names of genotypes). The names of best performing genotypes when subjected to certain levels of stress must be shown on the results as well as the performance of genotypes to various studies parameters should be shown on the results. Remember the study assess Kodo genotypes to stress tolerance.	
Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.	Yes, the author should also consult the journal guidelines for referencing and font size and type.	
Minor REVISION comments	Yes, the intext editing has been made	
Is language/English quality of the article suitable for scholarly communications?		
Optional/General comments	This is a good study the author should give time and explain the methodology and results clear.
