

## Review Form 1.7

Journal Name:	<b>Cardiology and Angiology: An International Journal</b>
Manuscript Number:	<b>Ms_CA_119522</b>
Title of the Manuscript:	<b>The Association between Platelet Lymphocyte Ratio and In-Hospital Outcomes in Patients with First Attack of Acute ST-elevation Myocardial Infraction following Thrombolysis with Streptokinase</b>
Type of the Article	

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. <b>Is the manuscript important for scientific community?</b> (Please write few sentences on this manuscript)</p> <p>2. <b>Is the title of the article suitable?</b> (If not please suggest an alternative title)</p> <p>3. <b>Is the abstract of the article comprehensive?</b></p> <p>4. <b>Are subsections and structure of the manuscript appropriate?</b></p> <p>5. <b>Do you think the manuscript is scientifically correct?</b></p> <p>6. <b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b></p> <p><b>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</b></p>	<p><b>Yes, it is because to identify the role of Platelet Lymphocyte ratio (PLR) in predicting in-hospital adverse cardiac events in patients with ST-segment elevation myocardial infarction (STEMI) thrombolysed with streptokinase</b></p> <p><b>Yes, it suitable</b></p> <p><b>Yes, it is</b></p> <p><b>Yes</b></p> <p><b>Yes, it is sure</b></p> <p><b>Yes, it is sure</b></p>	
<p><b>Minor</b> REVISION comments</p> <p>1. <b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p><b>Yes of course.</b></p>	
<p><b>Optional/General</b> comments</p>	<p>The manuscript is important for the scientific community. Its results showed that patients with high PLR had a higher rate of hospital complications, including arrhythmias, heart failure, cardiogenic shock, and death. The study also found that PLR was an independent predictor of in-hospital adverse cardiac events in patients hospitalized for STEMI thrombolysed with streptokinase.</p>	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Are there ethical issues in this manuscript?</b></p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
