<p><b>Optional/General</b> comments</p>	<p>The submitted paper deals with the construction of quasi-rational solutions to the seventh equation of the NLS hierarchy. Also, it provides explicit expressions of the solutions for the first orders which depend on multi-parameters. It studies the patterns of the solutions in the (x,t) plane according to the different values of the parameters, as well.</p> <p>The work carried out in this research article is interesting and new in this research field. However, real life applications of the equation with its solutions dealt in this study have to be presented with suitable examples. The authors are encouraged to improve the quality of the paper using proper English language. I recommend this paper for publication in Asian Journal of Advanced Research and Reports after minor revision.</p>
