

### Review Form 3

Journal Name:	<b>Asian Journal of Pediatric Research</b>
Manuscript Number:	<b>Ms_AJPR_120823</b>
Title of the Manuscript:	<b>Gilles-de-la-Tourette Syndrome in Childhood: Molecular Aspects and Recent Research.</b>
Type of the Article	

#### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://r1-reviewerhub.org/general-editorial-policy/>

#### **Important Policies regarding Peer Review**

Peer review Comments Approval Policy: <https://r1-reviewerhub.org/peer-review-comments-approval-policy/>

Benefits for Reviewers: <https://r1-reviewerhub.org/benefits-for-reviewers>

**Review Form 3**

**PART 1: Review Comments**

<b>Compulsory</b> REVISION comments		<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>8Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.</p>	<p><b>TOPIC has no meanings</b>  <b>Abstract is with out any structure, that is after Introduction there is no</b>  <b>(A)Type of study.( B)Methodology</b>  <b>1,Consent 2,where you did this study,3, sample size 4 data analysis (C)Conclusion. D)Keywords</b>            Similarly in main article, there also lack of proper order eg after the Introduction The all following order needed to be mentioned in an international journal study in order to make it understand to readers about your research.            Type of study.            Methodology            1,Consent 2,where you did this study was carried?,3, sample size 4 data analysis 5,selection criteria, 6 types of tools or instruments/ labs used            Discussion.            Conclusion            Conflict of interest</p>	
<p>Is the title of the article suitable? (If not please suggest an alternative title)</p>	<p style="text-align: center;"><b>Gilles-de-la-Tourette Syndrome in Childhood:</b>  <b>Molecular Aspects and Recent Research compared to our hospital MRI cases finding differences .</b></p>	
<p>Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p><b>Abstract is with out any structure, that is after Introduction there is no</b>  <b>(A)Type of study.( B)Methodology</b>  <b>1,Consent 2,where you did this study,3, sample size 4 data analysis (C)Conclusion. D)Keywords</b></p>	
<p>Are subsections and structure of the manuscript appropriate? No</p>	<p><b>No.</b></p>	
<p>Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.</p>	<p>The text starts with the topic "Gilles-de-la-Tourette Syndrome in Childhood: Molecular Aspects" including its epidemiology, genetic causes, also author explained neuroanatomy, than as usual its neurological symptomatology, prognosis, treatment and ended it with the discussion and references. In the middle somewhere in genetic causes some data calculated with some values, no type of study is mentioned. Is it Editorial? No, then please mentioned clearly follow the proper protocol of an article</p>	
<p>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form. - yes</p>		
<p>Minor REVISION comments  Is language/English quality of the article suitable for scholarly communications? Yes</p>	<p>Yes</p>	

### Review Form 3

<b>Optional/General</b> comments	<b>Reviewer's comment...</b> The text starts with the topic "Gilles-de-la-Tourette Syndrome in Childhood: Molecular Aspects" including its epidemiology, genetic causes, also author explained neuroanatomy, than as usual its neurological symptomatology, prognosis, treatment and ended it with the discussion and references.
