### PART 1: Review Comments

<b>Compulsory</b> REVISION comments	<b>Reviewer's comment</b>	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Please write few sentences regarding the importance this manuscript for scientific community. Why do you like (or dislike) this manuscript? Minimum 3-4 sentences may be required for this part.</b></p>	<p>To my observation, the manuscript has several issues which are very positive. Gender inequality is a debated topic in recent times especially in emerging countries like India. There is a need to understand what kind of inequalities exist in big, populated countries like India. It is necessary to acknowledge what kind of initiatives the government is taking to tackle this problem and what further can be done to remove the problem from its deep roots. There should be equal chance for women in all areas which is highlighted in this research.</p>	
<p><b>Is the title of the article suitable? (If not please suggest an alternative title)</b></p>	<p>Yes, mostly suitable. But it will be better to add what kind of analysis the research follows. Empirical or descriptive? It will give the reader full understanding of the methodology. Example: Empowering Women through Education and Skill Development: A Descriptive Analysis of Beti Bachao-Beti Padhao, Stand-Up India, and Skill India Mission.</p>	
<p><b>Is the abstract of the article comprehensive? Do you suggest addition (or deletion) of some points in this section? Please write your suggestions here.</b></p>	<p>The abstract does not comprehend on the significance or the challenges in promoting gender equality and empowering women in India. The abstract should clearly point out what is the significance of this research in today's context. The abstract should also point out what are the current gender inequality challenges prevailing in India. Also, what are the deeply rooted gender disparities in India isn't mentioned in abstract.</p>	
<p><b>Are subsections and structure of the manuscript appropriate?</b></p>	<p>Yes. The subsections and structure of the manuscript are appropriate.</p>	
<p><b>Please write few sentences regarding the scientific correctness of this manuscript. Why do think that this manuscript is scientifically robust and technically sound? Minimum 3-4 sentences may be required for this part.</b></p>	<p>The manuscript is qualitative in nature. Most of the information is collected from secondary sources where there is a chance of biased or incorrect information. Therefore, scientific robustness can't be measured in this manuscript. But the manuscript is technically sound as information are mostly collected from articles published in various journals.</p>	
<p><b>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</b> :</p>	<p>Yes. The references are sufficient and recent. But the references aren't arranged alphabetically. The references should be arranged alphabetically. There are some references where published date is missing. For example: 10. <p><b>Minor</b> REVISION comments</p> <p><b>Is language/English quality of the article suitable for scholarly communications?</b></p>	<p>The language/English quality of the article is suitable for scholarly communications.</p>	
<p><b>Optional/General</b> comments</p>	<p>The word "we" has been used in the introduction part. It is appropriate to use only third person words in research. There are no page number in the manuscript. There are some mistakes in some in-text citation which must be corrected. For example: Incorrect usage of citation: (Singh et. al., 2021) Corrected version: (Singh et al., 2021) No date in some in-text citations e.g., (Sharma, n.d.), (India, S.I.), (Tangirala, n.d.).</p>
