

Editor's Comment:

I have read the reviewer's comments about the manuscript 2024/IJTDH/118450, and the improvements included by the authors.

Manuscript Title: Role of delayed cord clamping in limiting blood transfusion in preterm babies' delivery Preterm: A case series of three Nigerian cases

According to the reviewer's criticisms, the manuscript 2024/IJTDH/118450.V1 is potentially suitable for publication in International Journal of TROPICAL DISEASE & Health. However, authors must include in the manuscript information about the ethical approval and consent of the hospital and patients involved in this study.
