(Please write few sentences on this manuscript)</li> <li>Is the title of the article suitable? (If not please suggest an alternative title)</li> <li>Is the abstract of the article comprehensive?</li> <li>Are subsections and structure of the manuscript appropriate?</li> <li>Do you think the manuscript is scientifically correct?</li> <li>Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</li> </ol> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>This manuscript is written based on ordinary research. The results are clear as expected but this manuscript is important for the scientific communities for similar experiment from other parts of the world. The data presentation is good but contains redundancy. The explanation of the reason behind the treatment effects is absence, the author tended only on mentioning the best treatment.</p> <p>There are several suggestions I can write here:</p> <ol style="list-style-type: none"> <li>Objective is not found. Please clearly mention the objectives in Abstract or Introduction or Materials and Methods.</li> <li>Redundancy must be avoided. Please check: Data for Figs 1 and 2 is the same as those in Table 2. Data for Fig 3 and Table 2 are the same. Also, data in Fig 4 and Table 4. Please use one type or data presentation, use either in table or in figure!</li> <li>Please insert one additional column after TREATMENT column in Tables 1, 2, 3, dan 4 to include shot explanation on T1 through T-9. This will increase the readability of these tables.</li> <li>Column Symbols in Table 1 is better to be deleted. You actually used notation T1 – T9 more rather than the symbols with T1 – T9.</li> <li>Reference is too thin, containing only 16 publications, only 3 of them are current. Please enrich the reference with enough relevant dan current publications.</li> <li>Mention the complete words of RDF the first time it appears.</li> <li>Arrange keywords alphabetically, do not use words already used in title.</li> </ol>	
<p><b>Minor</b> REVISION comments</p> <ol style="list-style-type: none"> <li>Is language/English quality of the article suitable for scholarly communications?</li> </ol>	Yes, it is
