<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>Yes, the manuscript is valuable for the scientific community as it documents a rare case of leiomyosarcoma, however a detailed description of the case should be presented. There is limited history of the patient presented at the beginning of the case presentation section. Also, the abbreviations used in the report are not elaborated. Making a few changes will improve this report, which are mentioned in this review.</p> <p>The title should be 'A Case Report of Leiomyosarcoma of the Femoral Artery; Rare Location and Management of Advanced Stage.' 'What' from the title should be removed as it does not seem right.</p> <p>The abstract require a little more detail of the case and please add conclusion in the abstract part.</p> <p>Yes</p> <p>Yes</p> <p>References are limited, please try to add more. Although, there are limited cases regarding leiomyosarcoma, author did not cite recent case reports. See e.g., Jakhetiya, Ashish, et al. "Limb Salvage Surgery for Primary Leiomyosarcoma of the Femoral Vein." Indian Journal of Surgery (2023): 1-3". Tresgallo-Parés, Ruben, et al. "Primary leiomyosarcoma of the great saphenous vein: a case report." International journal of surgery case reports 88 (2021): 106565.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>	<p>Introduction: For the line, 'To date, there are very few reported cases of arterial leiomyosarcoma involving the femoral artery, especially in medical oncology. The treatment of leiomyosarcomas, whatever their stage, requires multidisciplinary management'. Please add reference regarding the evidence of the use of multidisciplinary management for leiomyosarcoma, and also cite the few reported cases of arterial leiomyosarcoma, that you have mentioned at the beginning.</p> <p>Case Presentation: 1. In this section, more details of the demography and medical history of patient is required. Also, please give detailed interventions given to the patient, including details of the surgery and chemotherapy. 2. The statement, 'This is a 50-year-old hypertensive grade 2 patient on Amlodipine 10mg daily, who consults for a hard, progressively enlarging and slightly painful mass on the medial aspect of the left groin', should be written as, 'A 50 year old female patient came for a consult for a hard, progressively enlarged and slightly painful mass on her left groin. She was hypertensive grade 2 patient, for which she was taking Amlodipine 10 mg daily.' After this shed more light on her detailed medical history.</p>
