

Editor's Comment:

I have gone through the original and revised manuscript. Although the author has attended to reviewers suggestions, there are few things to be corrected. Please find some of those I have marked in the attached manuscript. Also the author has to mention how many replicas were used in agar disk diffusion assay and need to present the diameter of the inhibition zones with SD. Also the author has not mentioned positive and negative control of the assay. Please ask to make those changes and resubmit.
