<p><u>Minor</u> REVISION comments</p> <ol style="list-style-type: none"> 1. Is language/English quality of the article suitable for scholarly communications? 	<p>Congratulations to the author(s) for their paper. The paper explores that the best model for interpersonal communicative competence of students, influenced by academic resiliency, intercultural competence, and social and emotional learning.</p> <p>The topic of the manuscript is very relevant and in line with the aims and scope of the journal which makes this manuscript interesting. However, I have some minor concerns that need to be addressed. I'll explain them in the order of importance.</p> <ol style="list-style-type: none"> 1) Tables are structural forms with rows and columns. For this reason, shape and table separation should be done well. 2) The novel contribution of the manuscript shall be made clear in the introduction. What does the paper adds to international literature? 3) General statements shall be removed. 4) The adopted methodology shall be described. All methods used, assumptions made shall be justified. 5) Conclusions shall be specific and connected to your analysis of previous sections. 6) The English are very weak. There is a need for English Editing. 7) In my opinion, the policy recommendations do not have justification in the empirical results. 8) Please clearly highlight the literature gap this study tries to fill in. Let's write a selection from the current literature after 2019. It would also be helpful to write a literature section. It is very important to include this section. 9)Let's revise the way of giving references according to the spelling rules of the journal. 10) And lastly, the writing needs to be better. There are a plethora of run-on sentences and grammatical errors throughout. The writing issues sometimes make the paper difficult to read. Although there are not a lot of obvious mistakes, the style is clunky and I advise that the manuscript is proffered by a native English speaker. In general, the paper needs to be proofread and copy edited. <p><u>Disadvantage:</u></p>	

Review Form 1.7

	<p>✓ Having not enough images (for example table, figure, diagram, chart, graphic etc.) is a disadvantage for the paper.</p> <p>How to improve? :</p> <p>1- Those mentioned in the literature review can be tabulated. This makes it easier for the reader to understand.</p> <p>2- Overall, the abbreviations seem to be inconvenient since their notations were not explained when they first appear. Author(s) are suggested to revise the paper throughout.</p> <p>3- Overall, Author(s) are suggested to use more figure and table presentations which will help in understanding the whole picture of the study.</p> <p>4- Overall, more studies in the existing literature on the topic should have been cited/presented to make clear the contribution of the study. This will also help in showing how the study is going to fill the gap in the extant literature.</p> <p>5- Finally, the concluding in conjunction with the recommendations should address more specific outcomes of the contribution of the principles of the academic stability, social-emotional learning and interpersonal-intercultural communication in the environmental influences of socio-ecological model.</p>
