

Review Form 1.7

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_119289
Title of the Manuscript:	Role of Salicylic Acid In Mitigating Stress And Improving Productivity Of Crops: A review
Type of the Article	Review Article

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Yes</p> <p>Some additional references should be included: as given in the text of review article like Laishram et al., Gunes et al., Youssef et al. etc., for functions of salicylic acid in plants, sources of salicylic acid, for all figures, if taken from other sources, and for relationship between salicylic acid and other phytohormones.</p> <ol style="list-style-type: none"> 1. Some more key words are required. 2. At the end of introduction, molecular weight, density, boiling point and melting point of salicylic acid are given which should be covered in separate heading "Properties of Salicylic acid" with some other properties. 3. Content of Headings 2 and 3 should be revised. 4. Heading 5 can be reframed. 5. Figure 1 should be thoroughly checked for abbreviations given at the end of figure. 6. Spacing in some places need correction. 7. Punctuation in some places need correction. 8. A chemical reaction can be given in the sources of salicylic acid for its synthesis. 9. Formulae of some compounds/molecules should be written in specific format like $C_7H_6O_3$, H_2O_2 etc. 10. Check last statement before Fig. 5. 11. Numbering of Headings is mismatched. 12. Check spellings thoroughly like Abscisic acis, it should be Abscisic acid. 13. At the end of conclusion, abbreviations may be incorporated given in the whole review article. 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes</p>	
<p>Optional/General comments</p>		

Review Form 1.7

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
