

Review Form 1.7

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_119312
Title of the Manuscript:	Impact of Integrated Nutrient Management (INM) on growth attributes of strawberry (Fragaria × ananassa Duch.) in district Banda, Uttar Pradesh
Type of the Article	

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The manuscript addresses the impact of Integrated Nutrient Management (INM) on the growth attributes of strawberries, specifically in the district of Banda, Uttar Pradesh. The findings provide valuable insights into the use of nano urea and bio-fertilizers in enhancing strawberry growth, which is significant for agricultural practices and sustainability. This research is particularly relevant given the increasing interest in sustainable agriculture and the reduction of chemical fertilizer usage.</p> <p>The title is appropriate as it clearly reflects the study's focus on INM and its effects on strawberry growth in a specific region. It is precise and informative, which will attract the relevant audience.</p> <p>The abstract is comprehensive and summarizes the study's objectives, methodology, key findings, and conclusions effectively. However, it would benefit from improved readability through better punctuation and sentence structuring.</p> <p>The manuscript is well-structured with clear subsections. Each section logically follows the other, making the document easy to navigate. However, the introduction could be more concise to maintain reader interest.</p> <p>The manuscript appears scientifically sound. The experimental design, methodology, and statistical analysis are appropriate for the study. The results are well-presented and supported by data.</p> <p>The references are sufficient and recent, with a good mix of foundational studies and recent research. However, ensuring all cited works are formatted consistently according to the journal's guidelines is essential.</p> <ul style="list-style-type: none"> • Ensure all units are consistently formatted (e.g., cm, kg, etc.). • Clarify any abbreviations at their first occurrence. • Include graphical abstracts or visual aids to summarize key findings for better engagement. 	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>The language is generally suitable for scholarly communication but would benefit from minor grammatical corrections and improved punctuation. For example, breaking up longer sentences and adding commas where necessary would enhance readability.</p>	
<p>Optional/General comments</p>	<p>Consider adding a section on the practical implications of your findings for local farmers and how they might implement these practices. Additionally, including any limitations of the study and suggestions for future research would strengthen the discussion section.</p>
