

Editor's Comment:

Corresponding to reviewers' comments, the manuscript has been revised and improved.

However, I have still a few comments to improve the manuscript.

1. The title of the manuscript may be changed to "Biodiversity and ichthyofaunal richness of fish population in River Subansiri in the downstream of the lower Subansiri hydro-electric power project dam, Assam, India".

2. We can see some mistyping like "Assembladein" and "indownstream" in the title. Please carefully check mistyping through the manuscript.

Table 5 indicates the results of ANOVA. However, the values indicate the mean values of each physico-chemical parameter in pre-monsoon, monsoon and post-monsoon seasons. The variance of parameters among seasonal change should be shown in Table.
