### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p><b>Compulsory</b> REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p><u>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</u></p>	<p>Yes,</p> <p>Yes, but with a little adjustment. I suggest the title to read as; Relationship Between Workstation Collaboration and Classroom Culpability of Teachers in Public Elementary Schools (Location of The Study Is Required)</p> <p>Yes, just add instrument for data collection</p> <p>Yes, but preferably subsections under methodology can be merge and write concisely in sentences (optional please).</p> <p>Yes</p> <p>Literature is not well developed, see observations in the manuscript but the references are quite recent. Be consistent in writing the author(s) name before their reference number for in-text citation.</p>	
<p><b>Minor</b> REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes.</p>	
<p><b>Optional/General</b> comments</p>	<p>The manuscript title is lacking a research word that was the reason "Relationship" was added. The article is in short of literature review, it important for the author to let the readers understand the direction of the study right from the literature review. Objectives and hypotheses set focus for a study but this article is lacking them, consider providing four objectives and two hypotheses. Generally, the article would be good for publication especially if the observations made are corrected.</p>
