

Review Form 1.7

Journal Name:	Journal of Energy Research and Reviews
Manuscript Number:	Ms_JENRR_118626
Title of the Manuscript:	Unmanned Aerial Vehicle for Pipeline Surveillance: A review
Type of the Article	Review Article

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (This manuscript enhances the general understanding of UAV)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>1. In the manuscript, please elaborate on the methodology or Materials and Methods. It would be more effective if Methodology were added after the introduction.</p> <p>2.0 History and Concepts of Unmanned Aerial Vehicle (UAVs).</p> <p>1) To describe the history of UAV, it is recommended to use published scientific papers as a reference instead of blogs or personal websites. Kindly check out the most recent UAV development. I came across a straightforward article on the evolution of unmanned aerial system and the inconsistencies between strategies, concepts, and technology written by Huseyib Onder Aldemir @2024</p> <p>2) Explain how multispectral digital images can be utilized to evaluate soil morphological changes. This ability can be shown in a simple graph, especially in relation to oil leaks, oil spill, and land pollutions.</p> <p>7.0 Pipeline Network Monitoring and Management Aided with UAV It would be appreciated if figure 1 was clearly depicted</p> <p>Conclusion Please provide the integrated methods of sensing technique and UAV</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Please correct some spelling errors and grammatical errors</p>	
<p>Optional/General comments</p>	<p>Further reading the latest scientific papers on UAV to expand your knowledge of the UAV sensor.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
