

Editor's Comment:

Major revision

Yes, Yes, the topic described appears to be beneficial for the scientific community for several reasons, it covers integrated Watershed Management, Land Resource Mapping, Enhancing Agricultural Productivity, Local Case Study

No, quantification required in abstract for holistic approach, Lacking of key research highlights in the concerned abstract of the paper. Revision is required

No, the references are insufficient and require new / recent reference, several references are missing

It is also not arranged as per format of journal, which is essentially required

1. The introduction part need to well structured, it is submitted in immature state. More reference should be added in this section.
2. Material and methods part is too short and having lack of structure, kindly elaborate the methodology.
3. The result and discussion is not written with the reason and proper justification of the result and discussion parts are extremely poor, the results part is needed to be statistically sound.
4. At every page comments and suggestion has been added for update, please incorporate
5. Results need more explanation along with elaborative discussion with interlinkage of parameters. Not sufficient in discussion and also, not recent.
6. Conclusion part is poor, it should be based on the given contents.
7. None of the references are according to format of the journal, and also only few references are matching.
8. Most of the references are not mentioned in the text but it is added at the end of reference. Please add that one.
9. Review has been done in track change method also, and comments added in box for incorporation.
