

Review Form 1.7

Journal Name:	International Research Journal of Oncology
Manuscript Number:	Ms_IRJO_119067
Title of the Manuscript:	The Rising Challenge of Multidrug-Resistant Gram-Negative Infections in Hematologic Oncology: A Brief Review
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

Review Form 1.7

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p> <p>1. Is the manuscript important for scientific community? (Please write few sentences on this manuscript)</p> <p>2. Is the title of the article suitable? (If not please suggest an alternative title)</p> <p>3. Is the abstract of the article comprehensive?</p> <p>4. Are subsections and structure of the manuscript appropriate?</p> <p>5. Do you think the manuscript is scientifically correct?</p> <p>6. Are the references sufficient and recent? If you have suggestion of additional references, please mention in the review form.</p> <p>(Apart from above mentioned 6 points, reviewers are free to provide additional suggestions/comments)</p>	<p>The management of infections in patients with hematological malignancies remains a critical challenge due to the high mortality associated with Gram-negative bacteria (GNB) and the increasing prevalence of multidrug-resistant (MDR) strains. The need for prompt empirical antibiotic therapy is urgently required, yet the efficacy of traditional antibiotics is diminishing due to rising resistance. This comprehensive review aims to highlight the importance of routine blood culture monitoring, personalized risk assessment, and tailored antimicrobial policies based on local microbial flora and resistance patterns to target this common cause of morbidity and mortality in this patient population.</p> <p>The title is suitable</p> <p>The abstract is concise and comprehensive.</p> <p>The manuscript is structured well with appropriate sub sections.</p> <p>The manuscript uses apt scientific references to highlight the importance of MDR gram negative blood stream infections in hematologic malignancy patients.</p> <p>All references are sufficient and recent.</p>	
<p>Minor REVISION comments</p> <p>1. Is language/English quality of the article suitable for scholarly communications?</p>	<p>Yes the grammar and language are suitable.</p>	
<p>Optional/General comments</p>		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
